

Introducing the Easy Way to Deliver Safer Patient Care

At iApotheca we spend all day, every day, thinking up ways to make pharmacy life easier.

So when COVID-19 threw so many pharmacies into chaos, we knew we had to act fast.

We asked our customers if a simple delivery module would help.

After all, delivery is safer for everyone; patients and staff. And many pharmacies are scrambling to meet the increased demand for delivery.

The answer was an overwhelming, 'Yes!'

So we built the iApotheca Delivery software. As promised, we kept things quick and easy. Our EconoRoute™ feature routes deliveries *for you* in seconds, saving time and fuel.

And, you can get started in three easy steps!

1. Make your account.
2. Create a run and add orders.
3. Click 'EconoRoute™' for the most efficient route.

That's it! You're ready to deliver.
